

As a longtime Florida resident, since 1979, Bill Snow is very familiar with and deeply connected to the unique natural systems of our state. He spent several decades in South Florida, spending much time exploring the Everglades by canoe and on foot, as well as other Florida waterways such as the Peace River. Since moving to St. Augustine in 2007, he has become an active hiker and backpacker, having hiked over 750 miles of our Florida National Scenic Trail and 200 miles of the southern sections of the Appalachian Trail. Bill is the Membership Chair, the Chair of the Outings Team and a member of the Executive Committee of Sierra Club of Northeast Florida. He is also a Florida Master Naturalist and currently Vice President of the Northeast Florida Master Naturalist group. Bill retired in July 2017 from a career as an Information Technology executive.
